The Examiner acknowledges Applicants' submission of the amendment filed 1/30/04. Claims 1-46 are now pending.

***Claim Rejections - 35 USC § 112***

Claim 45 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

At lines 8-9 of the claim, "the thermal media" lacks antecedent basis.

***Claim Rejections - 35 USC § 103***

Claims 44 and 45 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 5942142 to Forney et al in view of Japanese patent document 64-053912 to Toda et al.

Forney et al discloses conveying a product through a chamber provided with a thermal media, heated air, which exchanges heat with the product by convection; the conveyor being also necessarily heated by convection, and in turn therefore also exchanges heat with the product by conduction. Forney et al does not disclose conveying the product on a plurality of thermally conductive elements. However, although Forney et al is silent about the conveyor details, Toda et al discloses conveying a product on a plurality of ceramic elements 5, which are thermally conductive. It would have been obvious to adapt the belt structure of Toda et al to the oven of co Forney et al since Toda et al teaches such to improve durability in oven applications.

***Allowable Subject Matter***

Claims 24-43 and 46 are allowed.

***Response to Arguments***

Applicant's arguments with respect to claims 44 and 45 have been considered but are moot in view of the new ground(s) of rejection.
